

Klüberfood NK1 Z 8-001 Spray

Cleaner / degreaser for the food-processing and pharmaceutical industries

Your benefits at a glance

- Rapid and thorough removal of oils, greases, waxes and resin residues
- NSF K1 and NSF K3-registered for applications in the food-processing and pharmaceutical industries
- Easy spray application

Your requirements - our solution

Klüberfood NK1 Z 8-001 Spray is an organic solvent cleaning agent. NSF K1 and NSK 3--registered for applications in the food-processing and pharmaceutical industries.

Application

Oil, grease, wax and resin residue remover compatible with plastics and metals, particularly suitable for degreasing tools and components.

Application notes

Spray Klüberfood NK1 Z 8-001 Spray thoroughly onto soiled components and allow it to react for a few minutes before wiping clean with a cloth.

Shake well before use. Hold aerosol vertical and spray in a thin layer from a distance of approx. 20 cm. Components treated with Klüberfood NK1 Z 8-001 Spray have to be cleaned with a suitable cleaning agent and rinsed sufficiently with tap water before using them again in the process.

Only to be used outside the manufacturing areas. Due to its very good solvency towards resins, we recommend undertaking a plastics compatibility test prior to use.

Please observe the notes on safe handling of sprays in the Safety Data Sheet.

Material safety data sheets

Material safety data sheets can be requested via our website www.klueber.com. You may also obtain them through your contact person at Klüber Lubrication.

Pack sizes	Klüberfood NK1 Z 8-001 Spray
Aerosol can 400 ml	+

The data in this document is based on our general experience and knowledge at the time of publication and is intended to give information of possible applications to a reader with technical experience. It constitutes neither an assurance of product properties nor does it release the user from the obligation of performing preliminary field tests with the product selected for a specific application. All data are guide values which depend on the lubricant's composition, the intended use and the application method. The technical values of lubricants change depending on the mechanical, dynamical, chemical and thermal loads, time and pressure. These changes may affect the function of a component. We recommend contacting us to discuss your specific application. If possible we will be pleased to provide a sample for testing on request. Klüber products are continually improved. Therefore, Klüber Lubrication reserves the right to change all the technical data in this document at any time without notice.
